^{1/} This plant to plant haul survey provides the geographic area were milk handlers are located of first receipt and plants of secondary receipt. The haul charges are for whole milk, skim milk, condensed milk and cream, etc.

^{2/} The approximate number of loads is calculated by taking total pounds shipped divided by 50,000 pounds.

3/ The average miles traveled from plant-to-plant (one way destination) is weighted on pounds shipped.

^{4/} Haul rates are based on cost per load or per hundred pounds of product.
